# Part 1: Description of Flexible LED module

**With the development of full color LED Display, more and more users seek special LED module that can form art like LED Display according to their needs, that's how Flexible LED Module came into being.**

# Part 2: Main features

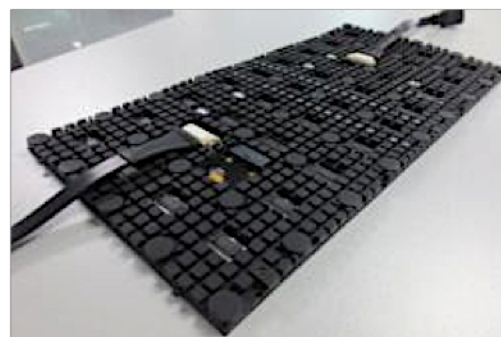

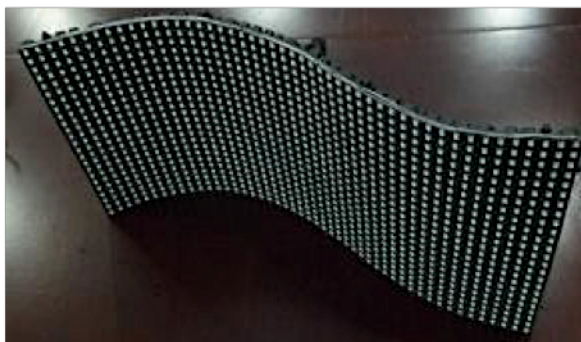

1. Made of soft PCB board, it can form concave, convex, or twisting curvature in both X & Y direction. So you can form LED Display in many different shapes, such as cylinder shape, wave shape, half circle shape, etc.
2. The magnetic backing on each FLEX tile means it's easy to attach them to any metal surface in whatever shape or size, quite convenient for DIY work and maintenance.
3. No need any cabinet for installation, all you need is a lightweight metal structure in the shapes you want to form. Much time and labor cost can be saved because of this feature.
4. Slim and thin. The module is only 8mm in thickness and 0.6kg in weight, much slimmer and more lightweight than regular rigid module. So it is easy to carry and to deliver.
5. Wide application: suitable for Staging, Events, TV studios, Signage. Advertising and architectural applications
